

# PRECISION IN EVERY DETAIL

The new zero-joint edge – the perfect combination of design, quality and sustainability.

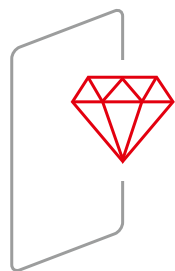

Conventional  
edge with  
hot-melt  
adhesive

New zero-joint  
edge with  
laser technology

## LEADING IN QUALITY AND DESIGN

The new Zero Joint Edge creates a permanently seamless connection between the surface and the edge, precision-manufactured using modern laser technology, with no additional adhesive.

The result is a visibly higher-quality appearance, combined with a robust, durable and easy-care edge suited for demanding applications across every sector.

## SEAMLESS FINISH

- Edge and element surface appear as if made from a single piece
- Premium appearance without visible transitions
- Modern laser technology for a visually seamless joint

## BUILT TO LAST

- Edge processing on all four sides
- Optimum protection against moisture
- Durable, hard-wearing and easy to clean
- Antibacterial surface tested in accordance with ISO 22196

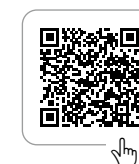

## SUSTAINABLE BY DESIGN

- 100% adhesive-free functional layer
- Resource-efficient manufacturing
- Formaldehyde: 95% below the limit specified by the EU Regulation\*

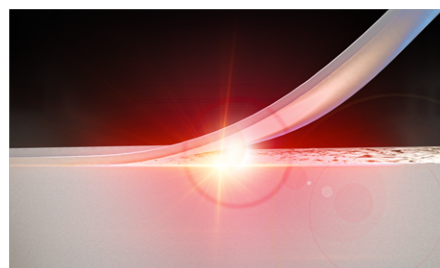

**Official Journal of the new EU Regulation**  
Applicable from 6 August 2026

**VOC/formaldehyde emissions testing**  
in accordance with AgBB/EN 16516

By using modern laser technology, Dorma Hüppe takes mobile partition systems to a new level of quality with the zero-joint edge.

\*From 6 August 2026, the maximum permitted formaldehyde emission is 62 µg/m³ – Dorma Hüppe cover panels with zero-joint edges achieve just 3 µg/m³.
